ReDuce > ReUse> ReWear! 5,000 square meters... MyMCPS Portal is a 21st century digital learning environment. From teaching and learning to community outreach to professional development, the myMCPS Portal is a next generation classroom. Access to the myMCPS portal will be available online and via the mobile app. Parents will receive activation information for their home portal account during the second week of school via US Mail or email. Please look for this important information. If you have not received this letter, contact your child's counsellor. Students will activate their account on the School Students' Portal during the first week of school with their teachers. Students must use their school assigned screen name and password. Please do not change the student registration details. myMCPS Student and Parent Portal: Check homework, Assignments, tests View classroom announcements Access documents/email resources Teachers review grades review student schedule Daily student emergency information Updates Email teachers Get myMCPS Mobile App iTunes Store Mobile web app Google Play Store The app will provide direct access to content available on the MCPS website, including information about schools, school calendar of the year, lunch menus, and the Board of Education. Those who download the app will have the option to receive push notifications or alerts on their phone or tablet about important MCPS news and closures or emergency delays across the district. Feedback Form | Research has been developed to centralise the collection of feedback from staff, pupils and parents; in the on the survey you can find on the support site: For support, please send myMCPSSupport@mcpsmd.org email and a team member will contact you shortly. © 1995-2020 Montgomery County Public Schools, 850 Hungerford Drive, Rockville, Maryland 20850 | Terms of Use | Non-discrimination | Accessibility | Ethical Portal/Gradebook/myMCPS Classroom-Parent/Student Portal, Gradebook and myMCPS Classroom are separate platformsTeachers have direct access to Gradebook and myMCPS ClassroomParents can only observe their child's class and myMCPS Classroom ©1995-2021 Montgomery County Public Schools, 850 Hungerford Drive, Rockville, Maryland 20850 Privacy | Terms of Use | Non-discrimination | Accessibility | Ethics No one imagined that classrooms would be virtual, this site is to help us find our way around all the various technologies we will use as we learn from home. MCPS hosts a parent webinar series for parents before school startes. They cover ParentVue, MyMCPS, and Zoom troubleshooting. The list of webinars is here: For more information about the different portals and systems of fellow parent within MCPS (H. Braswell) has compiled this useful list of all different platforms and technological terms.: *Google Apps for Education (aka G Suite for Education) - Students who are registered with MCPS, generate an account within Google For Apps Education, with their student application. You can access these Google apps in the Clever app or when your student signs in to Google. Google education apps include cloud products like Google Docs, Google Slides, etc. *Clever - Clever is a landing site used to access many educational tools in one location. Tools include Google Education Apps, Student MyMCPS/Canvas, Synergy Portal Access, and more. The same student application provided by MCPS will be used in Clever. Resources are customized by class. *MyMCPS Classroom - MyMCPS, launches Canvas, therefore these two names are used interchangeably. MyMCPS/Canvas, is a learning platform so all classes will be referred through the MyMCPS classroom. Google Classroom (old information is still visible) is no longer in use this year. MyMCPS Classroom is our district learning management system (LMS) that syncs with the synergy book to inform it which subject tiles to create for teachers and students. These tile in question, called myMCPS classroom courses, which contain the teaching facilities and instruction that teachers provide to students and parents for learning; links to zooming meetings, websites, files, task documents, videos, etc... Once you log in to MyMCPS/Canvas, you'll see an MCPS dashboard (same as last spring). I was able to access MyMCPS/Canvas through the Synergy portal, and on a mobile device via the Canvas app. Actual Daily he'll meet here. *Zoom (Video communication) – I believe everyone is familiar with it. One important note is that the sessions will be recorded and available to class students for about 72 hours. If you choose to exclude a student from audio and video (done through ParentVUE), you must turn off these features when logging into Zoom and the student will not be able to participate in the class verbally or visually, but can observe. *Kami - Used for PDF interactivity. Students can record, type, record their voice, and send assignments. Teachers can also provide a link to the task when you click on the link, a PDF can be opened in the Kami app, and students can do their class work *Synergy Portals (Student Information System aka SIS) - This school year MCPS uses a new platform run by Synergy to access student information. Synergy has different entry points (aka portals) for parents, students, teachers and administrators. Entry points are called ParentVUE, StudentVUE, TeacherVUE and AdminVUE portals. The Oasis portal and the gradebook will no longer be used this year. This Synergy portal provides access to student and classroom information. The same student login and password will be used to access everything needed for the fall's virtual learning environment. The student's application details will remain unchanged and parents have been sent their own access to the application, which must be activated. During your parents' first application, you will be asked to update your student's online registration, which is a replacement of yellow emergency cards (now referred to as the Annual Student Information Check). Each parent, who has custody, educational rights and where contact is allowed, was sent an individual activation letter via email or mail so you should have received this information by now. Since the class book and tools used to schedule students for classes take place in one location as a system (Synergy), the integration and synchronization of information is seamless and instantaneous; in real time. Click here to sign up to ParentVUE or StudentVUE (also on the MCPS website): Once in the synergy portal (parent or student) you will see a menu for things like Synergy Mail, Calendar, Attendance, Class Schedule, Course History, Class Book, School Information and Parent Resources. When logging into parentvue, you are considered an observer, so you will not have the same access availability as your student. You can access MyMCPS/Canvas in the synergy portal, by clicking the Parent Resources tab, and then clicking on MyMCPS Classroom. There were noticeable glitches in the system for the percentage of parents. Here's a form to submit if your ParentVue account doesn't include all of your kids. Alternatively you can contact Sandra Carrol in Greenwood office by sending e-sandra_l_carroll@mcpsmd.org . *More information: -Grades: To see class classes for completed work, you must be in the MyMCPS Classroom. Report tab ratings can be found under the Ratings tab on the main page of the Synergy portal. -Calendars: ParentVUE and StudentVUE calendars vary. ParentVUE calendar will display information as teachers enter completed work in the class, for reporting purposes. The StudentVUE calendar will display maturing tasks, zoom in on links, and allow students to access tasks. -Apps: Mobile apps are available for ParentVUE and StudentVUE. I also found them for Canvas (for now). -StudentVUE Login Details - One student login and password are used to log in to all resources. *Webinar Videos -Part 1: Introduction to ParentVUE webinar: -Part 2: ParentVUE Online Registration: -Unpacking your digital backpack (on additional educational tools and resources):
